† Towing capacities shown are maximums and must be reduced by the weight of any passenger, cargo, hitch or optional equipment in the towing vehicle. The following equipment may also be required: load-carrying hitch for trailers under 2000 lb and load-equalizing hitch for trailers over 2000 lb. Towing a trailer will have an effect on the vehicle's handling, braking, durability, performance and driving economy. For specific information on recommended or required equipment, see your Mazda Dealer. Hitches are available through manufacturers other than Mazda.

‡ EPA-estimated mileage. Actual results may vary.

** Always wear your seat belt and secure children in the rear seats in appropriate child restraints.

†† Back-up camera does not provide a comprehensive view of the entire area behind this vehicle.

‡‡ SIRIUS Satellite Radio-compatible audio system requires additional dealer-installed hardware and subscription.

*** Dynamic Stability Control (DSC) is an electronic system to help the driver maintain control under adverse conditions. It is not a substitute for safe driving practices.

Factors including speed, road conditions and driver steering input can all affect whether DSC will be effective in preventing loss of control. Please see the Owners Manual for further details.
